Woodworks & Joinery

Woodwork is a general term encompassing any activity involving shaping, cutting, and assembling wood. This can range from rough structural work (carpentry) to fine furniture making. Joinery is a specialized branch of woodworking that focuses on the art and science of connecting individual pieces of wood to create more complex items. It emphasizes precision and often utilizes specific techniques that ensure strength, stability, and aesthetic appeal, sometimes without the need for mechanical fasteners. Joinery typically takes place in a workshop setting, producing components like doors, windows, cabinets, and furniture, which are then installed on-site by carpenters.
